Dear Parents/Guardians,

Chico Unified School District uses a program called "**Securly**" to help keep students safe on their school-issued electronic devices. Securly allows parents to see which websites your child accesses during the school day and also provides tools to control which sites your child is allowed to access after school hours. As a parent, you should receive a weekly email from noreply@securly.com that is sent to the email account registered on your Aeries Parent Portal. You can **preview your student's online activity** and **access Securly Parent Portal from the email**. If you do not receive a weekly email from Securly, please check your Spam folder and also make sure you register for the Aeries Parent Portal.

There is more information about **Securly** at https://www.securly.com/home-parent.

The Securly Parent Portal can be accessed from any computer or the mobile app.

SecurlyHome   **Mobile App.**

Pause Chromebook internet access at home with a single tap on your **Securly Home Mobile App.**

Parent Portal - Access from the computer or Mobile App.   Contains three tabs:
1. **Activity** -shows a real-time audit trail of your child's online activity.
2. **Flagged** -shows posts that have been flagged by Securly as potentially related to self-harm or bullying.
3. **Rules or Settings** -allows you to block content on the device by Filter Categories like "Streaming Media" and "Games", or Sites address.   You control the securly filter at home only.

For more information on how to setup and use the Securly cell phone app go to http://bit.ly/SecurlyHowTo
